Notes to Editors

Dialog Semiconductor creates highly integrated, mixed-signal integrated circuits (ICs) optimised for personal portable, low energy short-range wireless, lighting, display and automotive applications. The company provides flexible and dynamic support, world-class innovation and the assurance of dealing with an established business partner.

With its unique focus and expertise in energy efficient system power management, and now with the recent addition of low energy short range wireless and VoIP technology to the portfolio, Dialog brings decades of experience to the rapid development of ICs for personal portable applications including Smartphones, Tablet PCs, digital cordless phones and gaming applications.

Dialog's power management processor companion chips are essential for enhancing both the performance in terms of extended battery lifetime and the consumers' multimedia experience. With world-class manufacturing partners, Dialog operates a fabless business model.

Dialog Semiconductor plc is headquartered near Stuttgart with a global sales, R&D and marketing organisation. In 2011, it had approximately \$527 million in revenue and was one of the fastest growing European public semiconductor companies. It currently has approximately 650 employees. The company is listed on the Frankfurt (FWB: DLG) stock exchange and is a member of the German TecDax index.
